Welcome to your guide to the GSK symposia at ERS 2022

4th–6th September 2022

GSK is delighted to be back together again at the European Respiratory Society (ERS) International Congress this year, and is hosting eight industry symposia.¹

We invite you to join us live or virtually and engage in conversation with global experts on hot topics like asthma, chronic obstructive pulmonary disease (COPD), treatable traits, COVID-19 and adult vaccination.

If you miss the in-person sessions, you can view them live or after the congress on the virtual ERS platform.

All eight ERS 2022 industry symposia are organised and funded by GSK.

Para notificar una sospecha de reacción adversa contacte con GSK a través de https://es.gsk.com/es-es/contacto/ o con el Sistema Español de Farmacovigilancia a través de www.notificaRAM.es

If you are professionally active in a country other than Spain, adverse events should be reported to the appropriate health authority in your country.

8am–9.15am CEST

‘Simplement’ it: Treatable Traits in practice

Dr Chris Compton (Chair)
Professor Ian Pavord
Professor Peter Gibson
Professor Mona Bafadhel
Professor Thys van der Molen

Join us at this non-promotional symposium, where we will discuss the implementation of the Treatable Traits approach and how to keep the process as simple as possible for busy clinicians.

1pm–2pm CEST

COVID-19 and respiratory patients: remaining risks and challenges

Dr Krystal Evans (Chair)
Professor Marta Boffito
Professor Tobias Weite

Join us at this non-promotional symposium, where we will explore how COVID-19 has evolved and discuss the role of respiratory physicians in early treatment and preventative management for respiratory patients.

6pm–7.30pm CEST

How molecular pharmacology is improving patient outcomes in COPD

Dr Chris Compton (Co-chair)
Professor MeiLan Han (Co-chair)
Dr Kai-Michael Beeth
Professor Claus Vogelmeier
Professor David Halpin

Join us at this promotional symposium, to explore how inhaled molecules with optimal pharmacological characteristics for maximal efficacy and tolerability are key to improving outcomes for patients with COPD.
MONDAY 5th September

8am–9.15am CEST
Redefining asthma goals: the evolving era of proactive control

Professor Ken Chapman (Chair)  Professor Dave Singh  Professor Guy Brusselle

This non-promotional symposium highlights the very latest evidence on asthma management. Three renowned speakers will put the clinical implications of emerging data into perspective, and discuss insights from physicians and patients.

1pm–2pm CEST
A unified approach: improving patient outcomes in severe asthma and comorbid eosinophilic diseases

Dr Joaquim Mullol (Co-chair)  Professor Peter Howarth (Co-chair)  Dr Christian Domingo  Professor Martin Wagenmann

Join us at this promotional symposium, to explore the main challenges in treating patients with severe asthma and comorbid eosinophilic diseases, and consider the latest thinking around management options that target the underlying pathology.

6pm–7.30pm CEST
Consulting the ORACLE: moving towards a predict and prevent model to raise ambition for patients with severe asthma

Professor Ian Pavord (Chair)  Dr Arnaud Bourdin  Professor Geoffrey Chupp  Dr Andrea Matucci

Join us at this promotional symposium as we consider more ambitious, multi-component treatment goals for patients with severe asthma, and discuss the implementation of a 'predict-and-prevent' model of treatment.

TUESDAY 6th September

8am–9.15am CEST
Your chronic respiratory disease patients – what do you know about their risk of infectious disease?

Dr Javier Diez Domingo (Chair)  Professor Tobias Welte  Dr Maria Rosario Menéndez  Professor Giovanni Gabutti

This non-promotional symposium will focus on the burden of preventable infections such as herpes zoster and pertussis in patients with chronic respiratory conditions, as well as the overarching importance of adult vaccination.

1pm–2pm CEST
Going FURTHER: from surviving to thriving on the asthma patient journey

‡

Dr Rob Cook (Chair)  Dr Nicole Hass  Olivia Fulton  Dr Kim Lavoie

Join us at this non-promotional symposium to explore the future of chronic respiratory diseases, particularly asthma, through the lens of the patient journey and the pursuit of a better quality of life.

6pm–7.30pm CEST
Consulting the ORACLE: moving towards a predict and prevent model to raise ambition for patients with severe asthma

Professor Ian Pavord (Chair)  Dr Arnaud Bourdin  Professor Geoffrey Chupp  Dr Andrea Matucci

Join us at this promotional symposium as we consider more ambitious, multi-component treatment goals for patients with severe asthma, and discuss the implementation of a ‘predict-and-prevent’ model of treatment.

‡The Going FURTHER symposium at ERS is programmed by Economist Impact with the support of GSK.

Economist Impact maintains editorial independence of the content of this symposium.
