Redefining respiratory care at ERS 2023

Welcome to your guide to the GSK industry symposia at ERS 2023
10–12 September 2023

GSK is delighted to attend the European Respiratory Society (ERS) International Congress this year, and is hosting eight industry symposia (organised and funded by GSK).

We invite you to join us live (or virtually) to engage in conversation with global experts on hot topics like asthma, chronic obstructive pulmonary disease (COPD), treatable traits and adult vaccination for RSV.

If you are unable to attend the in-person sessions, you can either view the sessions live or after the congress (until December 2023) on the virtual ERS platform.

Please visit the GSK stand in the Exhibition Hall to find out more about our latest data and developments. GSK products will be discussed. Prescribing information is available from the GSK stand, at the symposium and via the ERS viewing platform.

SUNDAY 10 September

12:15–13:15 CEST, Room: Coral 4+5 (Lunch will be available)
Clinical Remission: reimagine the outcomes for Severe Asthma patients

Professor Ian Pavord (Chair)
Tonya Winders
Professor Peter Gibson
Professor Enrico Heffler

Join these respiratory experts in an exploration of how timely intervention and advances in biologics can drive ambitious standards of care and help patients with severe asthma achieve Clinical Remission.

12:15–13:15 CEST, Room: Purple (Lunch will be available)
Mastering Integrated Respiratory Care: an expert-led interactive case study series, with a focus on vaccination

Dr Claudio Micheletto (Chair)
Dr Barbara Yawn
Professor Tobias Welte
Dr Maria Rosario Menéndez

Join our expert-led investigation on the risks of vaccine-preventable diseases and the role of vaccinations in the holistic management of patients with respiratory diseases.

17:30–19:00 CEST, Room: Coral 1
What do the GOLD 2023 updated recommendations mean for your patients living with COPD?

Professor Alberto Papi (Co-chair)
Professor Wisia Wedzicha (Co-chair)
Professor Claus Vogelmeier
Professor David Halpin

Join us to explore how the updated GOLD recommendations and device and molecule considerations can be applied to clinical practice for the optimised treatment of patients living with COPD.
MONDAY 11 September

12:15–13:15 CEST, Room: Coral 1 (Lunch will be available)
**IL-5 inhibition: an airways disease-modifying treatment strategy?**

*Join these respiratory experts to discuss the biology and advantages of IL-5-mediated disease modification in the management of severe asthma.*

**Add event to your calendar**

**12:15–13:15 CEST, Room: Coral 4+5 (Lunch will be available)**
**The next phase in proactive asthma management? Steps towards patient-focused personalised care**

*Join us in a discussion with leading respiratory experts on unmet needs in asthma management and key factors for a proactive, personalised treatment approach.*

**Add event to your calendar**

17:30–19:00 CEST, Room: Coral 3
**Understanding and managing RSV’s impact on older adults with respiratory conditions – clinician and patient perspectives**

*Join this discussion with respiratory experts to explore clinician and patient perspectives on the impact and management of RSV in people with existing respiratory conditions, such as asthma and COPD.*

**Add event to your calendar**

MONDAY 11 September (continued)

**Treitable Traits: realising personalised care in airways diseases**

*Join these leading experts to explore how multidisciplinary teams and a Treatable Traits model of care may improve patient outcomes.*

**Add event to your calendar**

TUESDAY 12 September

12:15–13:15 CEST, Room: Coral 1 (Lunch will be available)
**Making the right choice for your moderate asthma patients: what does the recent evidence say?**

*Join these experts in an informative dialogue on how real-world and modelling-based evidence can empower physician decision-making in the treatment of moderate asthma.*

**Add event to your calendar**

RSVPreF OA vaccine is not yet authorized in Italy. RSVPreF OA non è ancora autorizzato in Italia.
